WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Areas of morning fog possible. Mostly sunny with cooler than normal temperatures continuing. Highs in the upper 50s and lower 60s. Light winds at less than 10 mph.

Areas of morning fog. Showers will continue to be possible Monday morning with less than 0.10" possible. Then mostly sunny skies for the afternoon. High temperatures will be in the 50s to lower 60s, with light winds at less than 10 mph.

A cooler and more moist weather pattern will remain during the next 7 days, although there will be drier periods including today and Tuesday as well as the weekend. High temperatures will generally be cooler than normal and will be accompanied with higher humidity. Drier today and Tuesday due to ridging. Wind flow will tend to be light with just some localized breezes across the far north late Tuesday afternoon. The main unsettled period will be Wednesday through Friday as a moist southwest flow develops ahead of a strong Pacific trough. Southerly winds will increase ahead of the trough with gusts between 35 to 45 mph although local speeds buffeting the higher exposed ridges will be even higher. The strongest winds will occur on Wednesday and Thursday. Another round of wetting precipitation is likely for the majority of the area during this time frame. Liquid water amounts look to be decent once again with amounts up to 2.5 inches favoring the Mid Coast, North Coast, Northwest Mountains and Northern Sierra. The main precipitation period looks to be Wednesday night through Thursday night. The upcoming system will be warmer compared to the previous 2 systems so snow levels will be much higher.

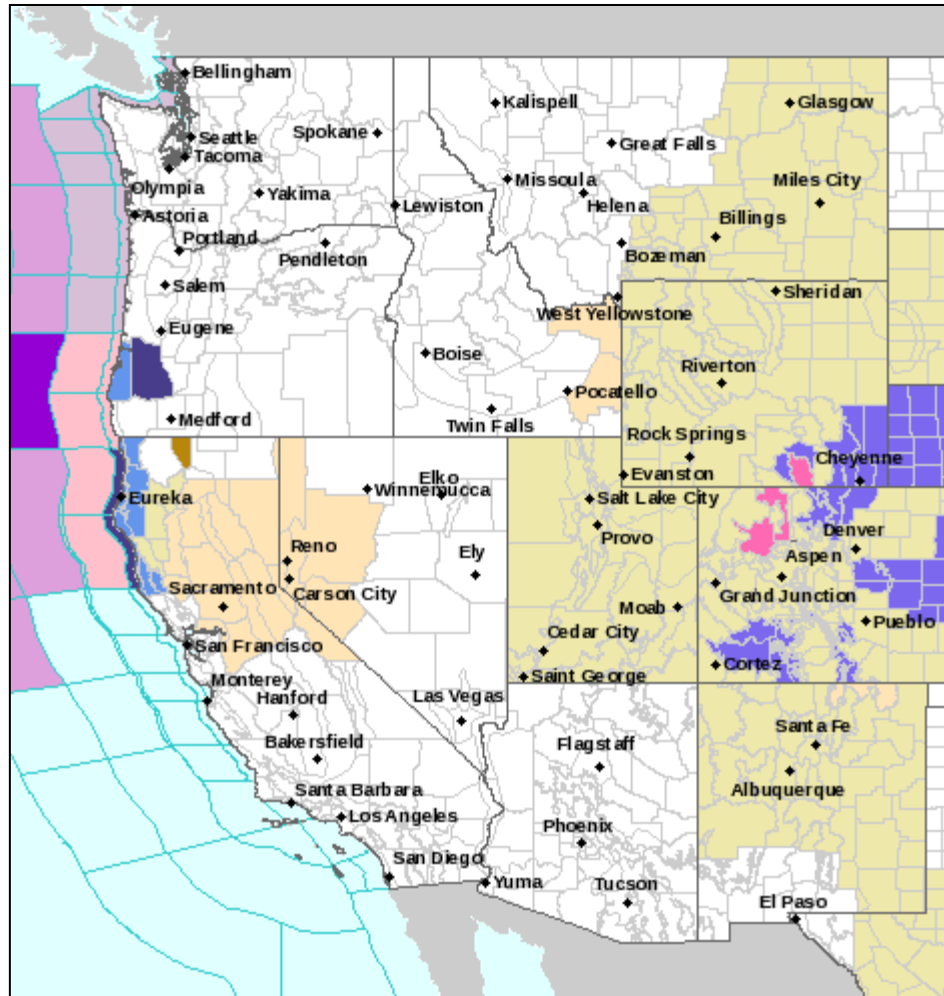

SOUTHERN CALIFORNIA

Mostly sunny. Highs in the 60s. West-southwest winds 8-12 mph.

A weak disturbance coming in from the southwest may bring scattered light showers with less than a tenth of an inch of rainfall to Southern California through Tuesday morning. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through Tuesday morning. Temperatures will be around 5 degrees below normal today, with upper 40s and 50s across the mountains and 60s to low 70s in the valleys. Temperatures will warm to near normal Tuesday and Wednesday as a weak ridge of high pressure builds into California from the Pacific Ocean. A Pacific trough will cool temperatures back down to around 5 degrees below normal Thursday and Friday. This trough will also bring scattered light showers to Central California Wednesday night through Friday afternoon. Westerly winds will increase to 20 to 30 mph with gusts to 50 mph once again across the mountains and deserts Thursday and Friday. A weak ridge of high pressure will warm temperatures back up to near normal this weekend. No strong offshore winds or hot and dry conditions are anticipated across the region for the next couple weeks.
